BAUER Certified a Qualified Supplier with Link-Up Qualification Scheme

After a comprehensive audit of its operations BAUER Technologies is pleased to announce that it has become a Qualified Supplier to the rail industry, under the **Link-Up** Qualification scheme.

Link-Up is the essential qualification process amongst the rail industry and is used extensively by procurement, engineering, safety and quality professionals as a measure of an organisation's competence to work across the rail network.

On achieving the award BAUER's Managing Director, Michael Jones, commented: "The rail sector is extremely challenging, competitive and demanding, and the Link-Up Qualification puts us in a very strong position to compete for business. We are already involved in a number of high profile rail projects, including the Tottenham Court Road Station upgrade and hope to have a strong involvement on the Crossrail project; this accreditation establishes our credentials and competence to deliver to this sector".

The Link-Up Qualification Scheme is run by specialist supplier management services organisation Achilles Information Limited, which brings supplier and supplier communities together through a single, fair, open and transparent process.
