Crossrail Project Provides an Optimistic Outlook for BAUER

With funding for the £15.9bn Crossrail project confirmed, BAUER Technologies Ltd is excited by the prospect of being involved in what will be one of the largest transport infrastructure projects of the next few years and when complete will link Heathrow to Canary Wharf via central London.

Speaking about the project BAUER's Managing Director, Michael Jones, commented: "This is an exciting, prestigious and high profile project, as it represents a considerable amount of investment in transport infrastructure, creating jobs as well as improving transport links across the Capital."

BAUER, already on site in London with their J/V Partner Keller on the prestigious Tottenham Court Road Station upgrade project, where it is delivering a complex foundation solution in a joint venture with Vinci BAM Nuttall (VBM), has an established reputation for delivering large-scale and difficult transport and infrastructure projects. This expertise will be put to good use on the more challenging aspects of the Crossrail project, where preliminary works are already underway, although the project will not be complete until an estimated 2018.
